MS in Economics, Arizona State University, May 2021
BS in Economics, Brigham Young University, December 2015, cum laude

TEACHING AND RESEARCH FIELDS

Macroeconomics, labor economics

TEACHING EXPERIENCE

Instructor

Spring 2023
Spring 2023, Fall 2022, Spring 2022, Fall 2021
Summer 2021

Spring 2021

Microeconomic Principles
Macroeconomic Principles (online)
Intermediate Macroeconomic Theory (in-person/online
hybrid)
Advanced Honors Macroeconomics (co-taught with Ed-
ward Prescott)

Teaching Assistant

Spring 2021	Financial Economics, assisting Rajnish Mehra
Fall 2020	Macroeconomic Principles, assisting Bart Hobijn
Spring 2020	Advanced Honors Macroeconomics, assisting Edward Prescott
Spring 2020	Analysis of US Economy, assisting Bart Hobijn
Fall 2019	Economic Development, assisting Stephie Fried
Fall 2019	Macroeconomic Principles, assisting Joanna Girante

Undergraduate Advising

Spring 2021	Honor's Thesis Committee Member for Jack Fuller and Justin Fink
-------------	---

RESEARCH ASSISTANT EXPERIENCE

Summer 2021	Research Assistant for Edward Prescott, Federal Reserve Bank of Minneapolis
2016-2017	Research Assistant for Joe Price, NBER

HONORS

2021	Distinguished Economics Graduate Instructor
2021	Best Third-year Paper Presentation
2021	John W. Teets Outstanding Graduate Teaching Assistant

CONFERENCES AND SEMINARS

2023	ASU Macroeconomics Workshop
2022	Midwest Macro Fall Meetings, ASU Macroeconomics Workshop
2021	ASU Macroeconomics Workshop, Ohanian-Hansen UCLA Workshop

PUBLICATIONS

"Changes in Parental Gender Preference in the USA: Evidence from 1850 to 2019" with Todd R. Jones and Joseph Price, *Journal of Population Economics*, 2023.

WORKING PAPERS

A Model of Wages with Endogenous Human Capital and Job Search (Job Market Paper)

Abstract: There are two paradigms which explain why wages grow over the lifecycle: human capital accumulation, and on-the-job search in an environment with search frictions. I reconcile both theories in a model of wages which includes endogenous human capital accumulation, endogenous search effort, endogenous job posting, and a lifecycle. The model is calibrated to the US using SIPP data. In the benchmark economy, both human capital and search contribute significantly to lifecycle wage growth and dispersion. To demonstrate the usefulness of the model, I perform a policy experiment where I increase tax progressivity. Increasing tax progressivity decreases wages, and the negative effect is driven more by a decrease in search effort than on a decrease in human capital accumulation. In contrast to the prediction of a pure human capital model, the model predicts that increasing tax progressivity has little effect on cross-sectional wage inequality.

Duration Dependence and Unemployment Persistence

Abstract: Unemployment is persistent over time, particularly as it decreases after recessions, but standard search models struggle to replicate this fact. I embed duration dependence in a basic search model and show that duration dependence helps to generate realistic unemployment persistence over the business cycle.

Intuitively, after recessions, the composition of the unemployment pool shifts to the long-term unemployed, and since they have lower job finding rates, this decreases the aggregate job finding rate and slows recovery. The effect is mitigated if (a) the appearance of duration dependence is driven by unobserved heterogeneity or (b) the recession is driven by a job separation shock.

PROGRAMMING SKILLS

Python, MATLAB, Stata, LaTeX
